Approaches for healthier eating and physical activities

1. Get in step
   • Begin with short walks and gradually increase your time or distance
   • Focus on your posture with your head lifted, tummy pulled in, and shoulders relaxed
   • Warm up at an easy pace for the first several minutes
   • Stay safe: walk on sidewalks and well-lit areas
   • Stop walking and check with your health care professional if you experience pain when walking

2. In proportion: sizing up healthy eating
   • Set aside small portions of snacks to eat when you have a craving
   • Use a portioned plate: 1/2 for vegetables or fruits, 1/4 for whole grains, and 1/4 for proteins
   • Think of reducing amounts, rather than cutting out your favorite foods
   • Establish regular meal times to avoid overeating later in the day
   • Pre-portion your servings to control the amount by placing a single serving in a container ahead of time rather than eating from the package

3. Eating together with family and friends: dining without counting calories
   • Substitute healthy alternatives like foods that are steamed or baked instead of fried
   • Enlist family and friends to support you in making healthy choices
   • Share an entrée with a friend at a sit-down restaurant
   • Research the restaurant to give yourself the best options for ordering
   • Request your meal to be served without gravy, sauces, butter, or margarine

4. On the go: keeping healthy away from home
   • Pack nonperishable, healthy snacks
   • Order water to drink with meals if you are dining out
   • Bring a meal from home to eat on the plane or in the car
   • Order smaller portions in restaurants
   • Find times and places to take walks like in the airport or through a hotel

5. Smart shopping: keeping your basket full and fresh
   • Make a list based on meal plans
   • Wait until after you have eaten to shop for food
   • Buy fresh foods when possible
   • Read nutrition labels for portion size, calories per portion, and saturated fat
   • Find healthy replacements
